

NEW RACER TRAINING

An introduction to track riding and advanced motorcycle control

\$450

taxes
included

Revised and expanded!

WMRC New Racer Training is a comprehensive, two day program designed to teach the fundamentals of safe track riding and competitive road racing. This course will prepare you to start racing immediately, but is also open and suitable to anyone looking to improve their riding skills or be introduced to track riding.

CLASSROOM KNOWLEDGE: Our classroom session will teach you to prepare yourself and your motorcycle for race and track days, advanced riding control techniques, race and track day procedures, etiquette, flags, and safety skills to get you ready for the upcoming riding sessions (and your future on track).

SKILL DEVELOPMENT AND PRACTICE: In this skill development session, you will learn to apply advanced riding techniques in small groups on a simplified circuit. You will receive one-on-one feedback from our experienced instructors and racers who can help you master these skills.

TRACK DAY AND REFINEMENT: Spend a full day with an instructor—both on and off the track—refining your skills, receiving race tips from our experts, and getting familiar with the track in preparation for your future as a racer or track day enthusiast.

Course graduates qualify for a free WMRC race license!

Spring School

(turn over for school requirements)

Requirements

- Class 6 License

- **Riding Gear:** All gear must be in safe operating condition and pass a quick technical inspection.

- **Helmet:** Full face with visor, must be Snell 2015 or ECE-22-05 rated, manufactured within the last 5 years.
- **Riding Suits:** One piece leathers preferred. Two piece zip-together leathers with a 360 degree zipper are accepted.
- **Gloves:** Leather riding or racing gloves. Gloves must extend to cover the wrists.
- **Boots:** Leather riding or racing boots that cover the ankles.
- **Back Protector:** A full length (shoulder blades to tailbone) CE level 2 back protector must be worn.

- **Motorcycle:** Your motorcycle must be in safe operating condition and pass a quick technical inspection.

- Good condition with no fluid leaks or obvious mechanical damage of any kind. Roadworthy condition and must be operating correctly.
- It must have a functioning kill switch.
- Removed or taped up lights, signals, license plate and mirrors. (Often done at the track for those who ride there.)
- Tires in good, safe condition.
- For track days and schools we will allow antifreeze coolant. However if you are planning on doing multiple track days or schools we strongly urge you to use a substitute non-glycol based coolant.
- No K&N spin on oil filters will be allowed.
